Examiner's statement of reasons for Allowance

The following is an examiner's statement of reasons for allowance: For claims 1 and 22, the prior art of record does not teach or fairly suggest a wireless access gateway for providing a telecommunications link between a BTS and a packet switched network, the wireless gateway comprising a packet agent in communication with the BTS and the packet network, the packet agent packetizing frames from the BTS into packets and depacketizing packets into frames for the BTS, a coding agent, a RF manager in communication with the packet agent and a signaling control agent in packet communication with the packet agent, the signaling control agent controlling the packet agent,

For claim 30, the prior art of record does not teach or fairly suggest a method for setting up a call to a MS via a circuit switched network and a packet switched network comprising the step of having a session manager receiving, via a signaling gateway a request from the circuit switched network to terminate a call to the MS and the session manager sending via the packet switched network a first instruction message to a trunk gateway being connected to the circuit switched network, the instruction message instructing the trunk gateway to transmit packets containing content from the circuit switched network to a destination address in the packet network.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
